

Aman Patre MERN Stack Developer

aman.k.patre@gmail.com | 9404930204 | Nagpur, Maharashtra | LinkedIn | GitHub | LeetCode

SUMMARY

Full Stack Developer with hands-on experience building responsive and scalable web applications using React.js, Node.js, Express.js, and MongoDB. Skilled in frontend and backend development, REST API integration, database operations, debugging, and application performance optimization. Strong understanding of JavaScript (ES6+), HTML5, CSS3, SQL, and modern web development practices. Passionate about building high-quality applications, solving real-world problems, and writing clean, scalable, and maintainable code.

SKILLS

Frontend & Backend	Databases	Core Concepts	Tools & Platforms
React.js, JavaScript (ES6+), HTML5, CSS3, Responsive Web Design, React Router, Context API, Node.js, Express.js, REST APIs, API Integration, CRUD Operations	MongoDB, SQL, Database Operations, Relational Database Basics	Full Stack Development, Web Application Development, Scalable Code, Debugging, Application Performance Optimization, Problem Solving, Clean Code Practices, Software Engineering Fundamentals	Git, GitHub, Postman, Vercel, Render

EDUCATION

Bachelor of Technology in Information Technology, Kavikulguru Institute of Technology And Science, Ramtek, (Nagpur) CGPA: 7.95	28/12/2021 – 05/06/2025 Ramtek, India
Computer Science, Kuthé Patil Junior College Of Science And Arts, Desaijanj (Gadchiroli) Percentage: 70	11/09/2019 – 20/05/2021 Desaijanj, India

PROJECTS

- Expense Tracker**, Technologies: MongoDB, Express.js, React.js, Node.js, JWT, Chart.js, Ant Design
- Built modular backend services and reporting dashboards for efficient financial tracking and analytics.
 - Implemented secure authentication and authorization using JWT, OTP-based email verification, and bcrypt hashing.
 - Designed and integrated scalable REST APIs with modular routing and centralized error handling for efficient frontend-backend communication.
 - Developed responsive frontend interfaces using React.js to improve usability and application responsiveness.
 - Worked with MongoDB database operations and optimized backend data handling workflows for improved scalability and performance.
 - Integrated Chart.js dashboards to visualize financial insights and spending analytics.
 - Utilized Postman for API testing, debugging, and validating backend endpoints.
 - Debugged and tested application modules to improve software reliability and maintainability.
- Job App**, Technologies: React.JS | JavaScript (ES6+) | CSS | REST API | JWT | React Router
- Developed responsive and user-friendly frontend interfaces using React.js, JavaScript, HTML5, and reusable UI components.
 - Implemented scalable frontend state management and reusable UI components to improve maintainability and application structure.
 - Integrated REST APIs and optimized frontend-backend communication to improve application responsiveness and user experience.
 - Improved cross-platform compatibility and frontend responsiveness to enhance overall user experience and UI consistency.
 - Built responsive and user-centric UI components using React.js, HTML5, and CSS3, ensuring seamless user experience across devices.
 - Optimized frontend rendering and resolved UI inconsistencies to improve application performance and user experience.
 - Utilized Context API for scalable global state management and improved code reusability.
 - Debugged frontend issues and improved UI consistency, performance, and maintainability across application modules.
 - Collaborated on debugging frontend issues and improving UI consistency across application modules.
- E-commerce App**, Technologies: React.JS | JavaScript (ES6+) | CSS | REST API | JWT | React Router
- Built reusable frontend components and responsive layouts to improve maintainability and user experience across devices.
 - Developed reusable frontend components and integrated backend services for efficient application workflows.
 - Implemented responsive web layouts using modern CSS techniques and user-centered design principles.
 - Integrated scalable RESTful APIs and third-party services for efficient frontend-backend communication and seamless application workflows.
 - Designed responsive web layouts using modern CSS techniques to improve user experience across multiple devices.
 - Managed shared application state using Context API for better maintainability and scalability.
 - Optimized frontend rendering and backend workflows to improve application performance, responsiveness, and scalability.
 - Collaborated on debugging and improving application modules to ensure reliable web application functionality.

CERTIFICATIONS

- ReactJS - Nxtwave Disruptive Technologies
- NodeJS - Nxtwave Disruptive Technologies
- JavaScript - Nxtwave Disruptive Technologies
- SQL - Nxtwave Disruptive Technologies
- Python - Nxtwave Disruptive Technologies
- HTML,CSS,Bootstrap - Nxtwave Disruptive Technologies

AWARDS AND ACHIEVEMENTS

District Level Project Exhibition (DIPEX) — Award Recipient, *DIPEX*

- Awarded at district-level engineering competition for outstanding project design, presentation, and technical execution in front of a judges panel.
- Demonstrated strong problem-solving, communication, and team collaboration skills in a competitive environment.
